

Artipic Overview

Artipic

Artipic is a state-of-the-art image editing system that allows you to quickly and easily retouch, compose and distribute your great pictures.

*Are you an amateur or professional photographer?
Do you take a lot of great photos when travelling?
Do you want to edit those using professional tools and publish online?
Are you tired of paying a fortune for graphics packages where you never use 80% of the functionality?*

Then Artipic is the way to go!

Functionality

Rich set of tools for painting and transformations

- Set of brushes with various geometry and shapes. Custom brushes
- Standard tools (Stamp, Crop, Color Picker / Sampler, Text, Ruler, Zoom, Move, etc.)
- Special tools (Blur Brush, Healing Brush, Red Eyes Reduction, etc.)
- Gradient fills. Custom gradients
- Shapes and Paths
- Transformation (rotation, flip, skew, distort, perspective, etc.)

Image Adjustments

- Curves. Levels
- Hue & Saturation. Brightness & Contrast
- Color Balance. Exposure. Gamma Correction
- Colorize. Tint. Color Temperature
- Photo Filters. Color Enhancer
- B&W. Desaturation
- Posterization. Threshold. Inversion

Image Filters and Effects

- Sharpen. Smoothen
- Box and Gaussian Blur
- Drop and Inner Shadow
- High Pass Filter. Diffuse Glow
- Vignette. Add Noise
- Signs. Watermarks

Reversible Stylization

Style Module allows managing presets of effects (all the image adjustments, filters and effects mentioned above) and applying them to images without affecting the source. You can use existing ones, modify them or create your own presets:

The effects are “real-time”: you can keep editing picture (painting, etc.) with the effects constantly applied.

Batch Processing

Batch Module empowers to format large numbers of images by applying predefined action sets. Automatically adjust and upload your images for further distribution (be it Instagram or an e-commerce CMS platform) with a single click.

Batch Module enables taking any set of files or folders and processing them using capabilities as follows:

- Applying any combination of image adjustments, filters and effects mentioned above
- Resizing images to common dimensions resolutions. Cropping images
- Cutting background for further composition
- Rotating images by a free angle
- Shading images
- Composing images with other images (signs, backgrounds, etc.) using various modes
- Applying watermarks
- Setting output structure and defining target image formats
- Defining naming policy

Batch Module also allows saving configured batches for further use, defining processing policies and monitoring both process and results by batch progress dialogs and batch reports.

Selection Management

- Selection by areas using various shapes and combinations. Selection of parts of images
- Selection on mask. Channels
- Color selection. Magic wand

Layers and Masks

- Composing images and parts of images using layers with various blending modes
- Layer masks. Gray-scale masks. Paint on masks
- Masks on selection. Channels

Special Tools

- Navigator to scale and analyze images “on the fly”
- Clipboard Module to manipulate objects copied to the clipboard, internal and from 3rd parties
- Path and Channel Management
- Export and Share Module to set up target destination parameters and limitations (e.g. image dimensions and size on disk) and apply them to images

Powerful and Easy

Artipic is a powerful image editing solution that can operate with large files of all popular image formats including RAW formats of the world's best-known camera manufacturers.

Artipic currently runs on MS Windows and Mac OS. The list of operating systems is extending (Android, iOS, Windows Phone, Chrome OS, Linux).

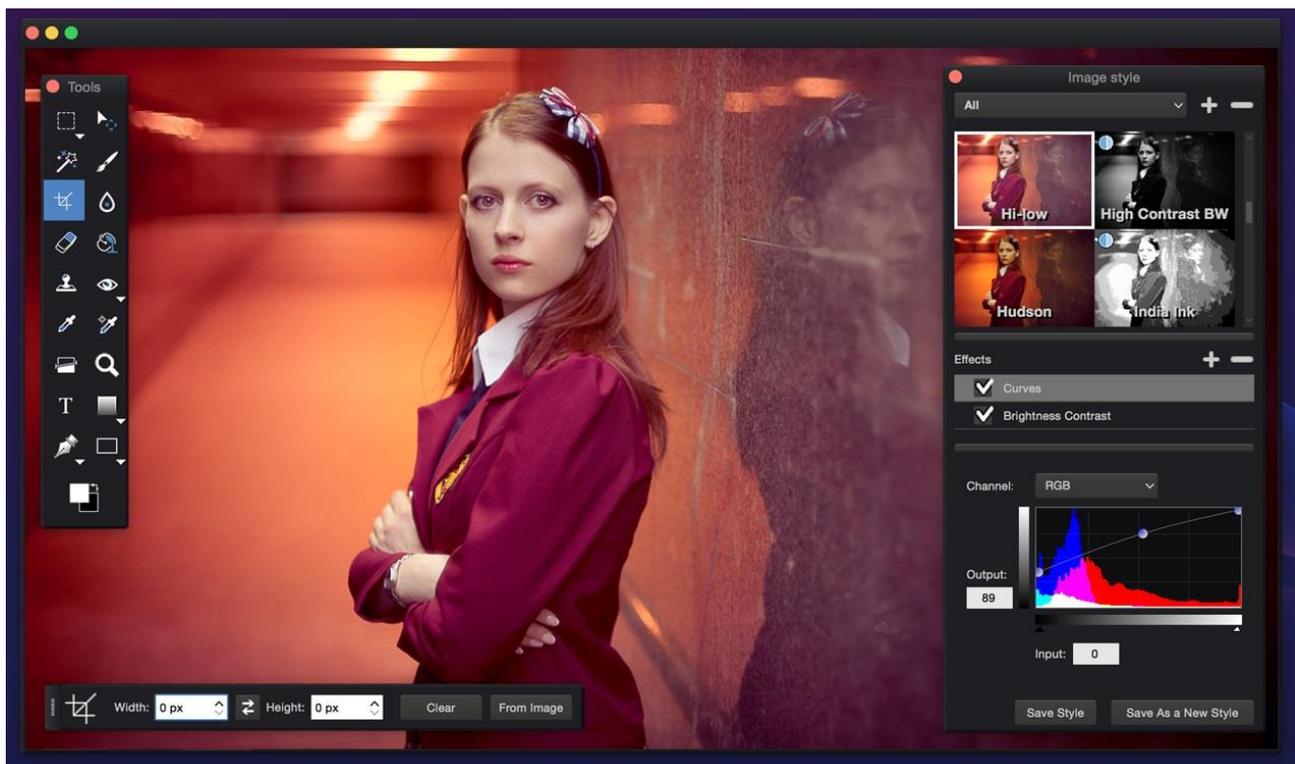

Using Artipic couldn't be easier. Because it follows industry standards, anyone who has worked with other products will find Artipic familiar!
